

It is critical to assert and achieve the goal of captioning all television programming, news and movies. Without captions, the deaf, hard of hearing, many immigrants learning English and many elderly people cannot remain apprised of news and popular culture. Deaf children's reading is improved by captioning and deaf teenagers would be lost, socially, if they could not watch the same programs as their normal hearing peers. To include these groups, please require the captioning of all programs and movies.
